

Hej guys,

My name is Yuti and I'm 21 years old. I just arrive in the Center Fenix which is located in Bosnia, in the city Sanski Most. I obtained my baccalaureate in Literature and then I made (and succeeded) my bachelor's degree „Lea English-German“ in Lyon in order to improve my skills in languages. I decided to do an EVS project because it was the opportunity for me to faster my knowledge in English and to help poor people. I like to have new friends, to meet new people and then to help them. Furthermore, the reason why I came in this Center is because there is a programm for pregnant women and I think this is fantastic. I can't wait to start, to be useful... That's it, even if I will miss France a lot, I want to set myself a challenge, help people in need, discover Bosnia and its culture and to make new friends. Regarding the permit of my studies, I am seriously thinking of being an english teacher.
